Summary

Frontend Web Developer specializing in Vue.js, Nuxt.js, and TypeScript, with experience in building scalable, AI-integrated web applications. Focused on creating performant solutions with clean, maintainable code and exceptional user experiences.

Experience

Frontend Web Developer

Jan 2025 - Present

Freelance / Remote

- Developed scalable web applications using Vue.js, Nuxt.js, TypeScript and TailwindCSS for diverse client projects
- Integrated AI-powered features to enhance user productivity and application functionality
- Delivered projects on time with a 100% client satisfaction rate through iterative feedback and agile development practices
- Built comprehensive documentation platforms with real-time preview and search capabilities

Core Skills

- Vue.js
- Nuxt.js
- TypeScript
- TailwindCSS

Projects

Brainbox | AI Chatbot Platform | brainboxaichat.vercel.app

An AI-powered chatbot platform designed to provide knowledge and assistance across diverse contexts.

- Added context-aware feature allowing users to upload documentation and resources that the LLM can crawl for more accurate, domain-specific answers
- Built with Vue.js, Nuxt.js, and TypeScript for a fast, scalable frontend
- Integrated Supabase for backend services and authentication
- Leveraged Gemini and Vercel AI SDK for conversational intelligence
- Designed sleek UI with TailwindCSS, Nuxt UI, and Vaxee for a modern experience

Keepdotdev | Code Documentation Platform | keepdotdev.vercel.app

A comprehensive code documentation platform with AI-powered assistance and real-time Markdown preview.

- Developed intuitive documentation editor with Markdown support and instant preview
- Integrated Gemini + Vercel AI SDK to provide intelligent code interaction features
- Implemented advanced search and retrieval system for documents and code snippets
- Optimized workflow efficiency with a clean, developer-friendly interface using Nuxt UI

Examine | Assessment Management Platform | examine-app.vercel.app

An exam management platform for instructors to create, publish, and analyze assessments.

- Implemented automatic grading using instructor-defined keys to reduce grading time
- Built real-time analytics dashboards for performance tracking and assessment insights
- Designed instant feedback mechanisms for candidates, including score breakdowns and time metrics
- Powered by Vue.js, Nuxt.js, TypeScript, UnoCSS, and Supabase for scalability

Education
